# IT Future of Medicine – Why now?

**2008:** GINA (HR 493) enables data sharing

**2011:** Batelle Report: Genome Project  
ROI to U.S. economy of 140 to 1

**2011:** NAS Precision Medicine

**2012:** Million-fold drop in data costs continues

# US & EU Next-generation technologies → IT

1. Polonator	MA	18. GnuBio	MA	33. Nanophotonics Biosci	CA
2. Roche-454	CT	19. Bionanomatrix	PA	34. Network Biosystems	MA
3. AB-SOLiD	MA	20. Halcyon	CA	35. SeiraD	NM
4. Illumina	UK,CA	21. ZS Genetics	NH	36. Affymetrix	CA
5. CGI	CA	22. Electron Optica	CA	37. Population Gen Tech	UK
6. Helicos	MA	23. Genizon BioSci	QC	38. AQI Sciences	AZ
7. Pacific Bio	CA	24. LaserGen	TX	39. Base4innovation	UK
8. IntelligentBioSys	MA	25. GE Global	NY	40. Li-Cor	NE
9. Ion Torrent	CT	26. Stratos Genomics	WA	41. U.S. Genomics	MA
17. LightSpeed	CA	27. Reveo	NY	42. Mobious Genomics	UK
10. Genapsys	CA	28. Firebird	FL	43. Visigen	TX
11. Electronic Biosci	CA	29. Zeiss	MA	44. Starlight	CA
12. Nabsys	RI	30. Lucigen	WI		
13. OxfordNanopore	UK	31. Adv. Liquid Logic	NC		
14. IBM-Roche	NY	32. Caerus Molec Diag	CA		
15. NobleGen	MA				
16. Genia	CA				

# IT & Genomics impacts treatment & approval

**Nic Volker: not intestinal surgery → cord blood**

**Beery twins: not cerebral palsy → Diet 5HTP**

**Ivacaftor: treat CFTR G551D → 3 months in FDA**

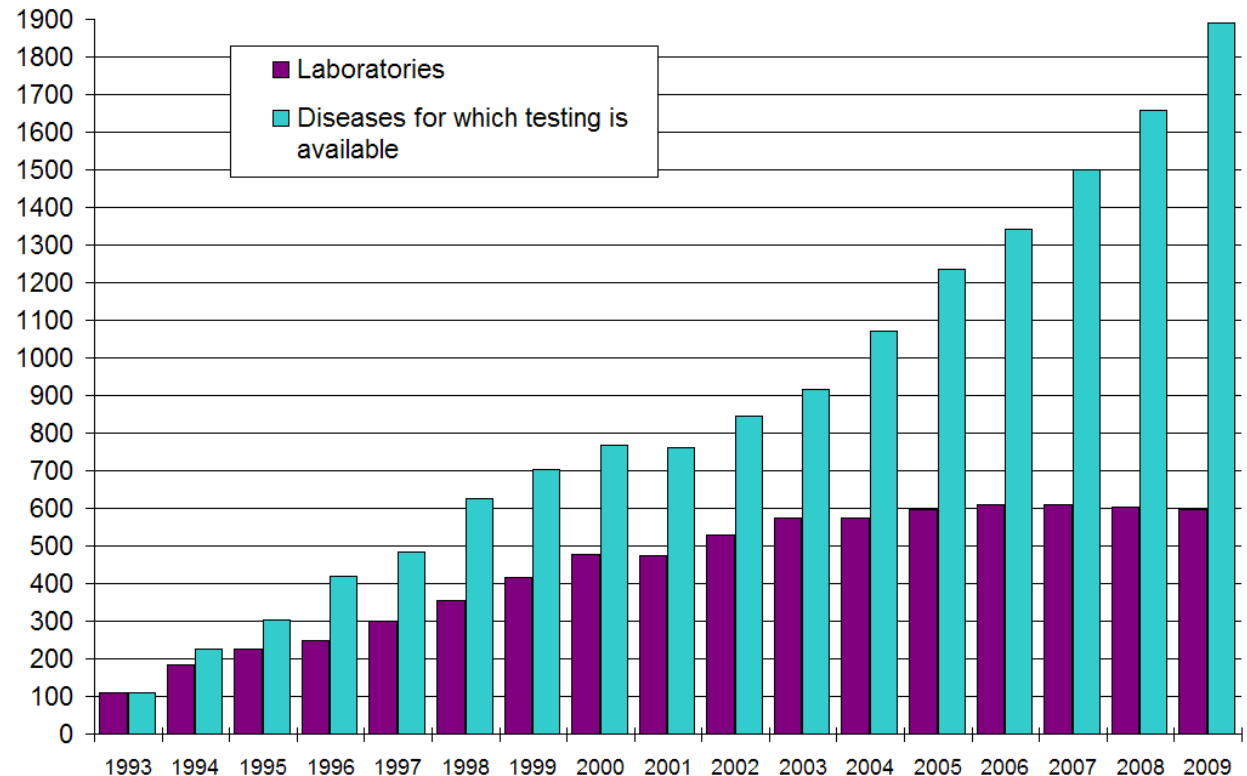

# Individually Rare -- Collectively Common (10%)

2641 diseases (~6000 genes) are highly predictive & medically actionable. **Next: Education & IT.**

**1963 PKU**

**1991 BRCA**

**2010 HCM**

Genetests.org

PGEd.org

# Rare Protective alleles

- **MSTN** -/- Lean muscles <0.001%
- **LRP5** -/+ Extra-strong bones 0.001-8%
- **PCSK9** -/+ Lower coronary disease 3, 0.06%
- **CCR5** -/- HIV-resistant (Pox/Plague) ~0, 1%
- **FUT2** -/- Stomach flu resistant 20%

Embrace the extremes: informative, easy, powerful

[blog.personalgenomes.org](http://blog.personalgenomes.org)

# **ITFoM Enviromental Data**

**Microbe tests: Detect Drug resistance spectrum  
Earlier warning (e.g. meningitis) 2 to 8 hr**

**Immune tests: Focus on response to exposure  
Longer times to detect exposure (e.g. HIV, TB)**

## Rare (therapeutic) antibodies

Broadly reactive antibody ... potent neutralization of HIV-1 ... unusually long, 28-amino acids (84 bp), CDR3... towers above the antibody surface. Pejchala et al. PNAS 2010

Antibody-based protection against HIV infection by vectored immunoprophylaxis  
Balazs, Baltimore et al. Nature 2012

# Precise Genome Therapy: prevent/cure HIV

"Long-Term Control of HIV by  
CCR5  $\Delta$ 32/ $\Delta$ 32 Stem-Cell  
Transplantation" 2009  
*New England J Medicine*

Sangamo Phase 2 clinical trial

# New data sources: Personalized organs-on-chip

+ neural,  
blood-brain-  
barrier, skin,  
testis

# Genomes

= Traits

## Personal Genome Project

Testing new technologies

Cohorts approved for sharing

PERSONAL  
**GENOME**  
3M alleles

**TRAITS**  
(Phenome)

# Genomes + Environments = Traits

## Personal Genome Project

Testing new technologies:  
Cohorts approved for sharing
